### **YesEco Acoustics Solution Helped Finnish Parliament**

Parliament House of Finland underwent extensive renovations in 2015-2017. During this 2-year interval parliament plenary sessions were held in the refurbished nearby Sibelius Academy Concert Hall.

After the first plenary sessions in the interim plenary hall, it became obvious that the acoustics was less than ideal for plenary sessions. Both sidewalls of the hall were lined with YesEco Still TK-acoustic panels. The acoustics panels proved excellent and they served the needs of parliament while it convened in the interim plenary hall.
